

BAG in a BOX

Speciality Cleaning Chemicals that perform to high professional standards, plus innovative new 'Bag in a Box' packaging that is environmentally responsible.

Peerless PRO 'Bag in a Box' packaging is far friendlier than conventional plastic drums. Of the total 'Bag in a Box' package, 88% is the corrugated cardboard box which is totally recyclable and the bag that remains, contains less than 10% of the plastic of comparably sized plastic drums and takes up only 5% of the space that the plastic drum occupies when disposed of in a landfill.

Disposal of the used chemical drums is becoming increasingly more difficult and poses sensitive issues as to the impact on the environment. 'Bag in a Box' packaging address these issues and provides the responsible alternative.

- » Pack Size - 15 Litre
- » Every 'Bag in a Box' pack is fitted with a non-drip dispensing tap
- » Provides easy, fast dispensing of chemicals
- » Multi wall liner bags provide contamination free products
- » Used line bag uses only 5% of landfill space of comparable size plastic container
- » OH&S advantages - lighter lifting or carrying loads than some conventional containers
- » Compact design for effective shelf storage
